Removes Paint FAST from these SURFACES

Old house paint softens up in seconds — no matter number of coats or if paint is cracked and checked.

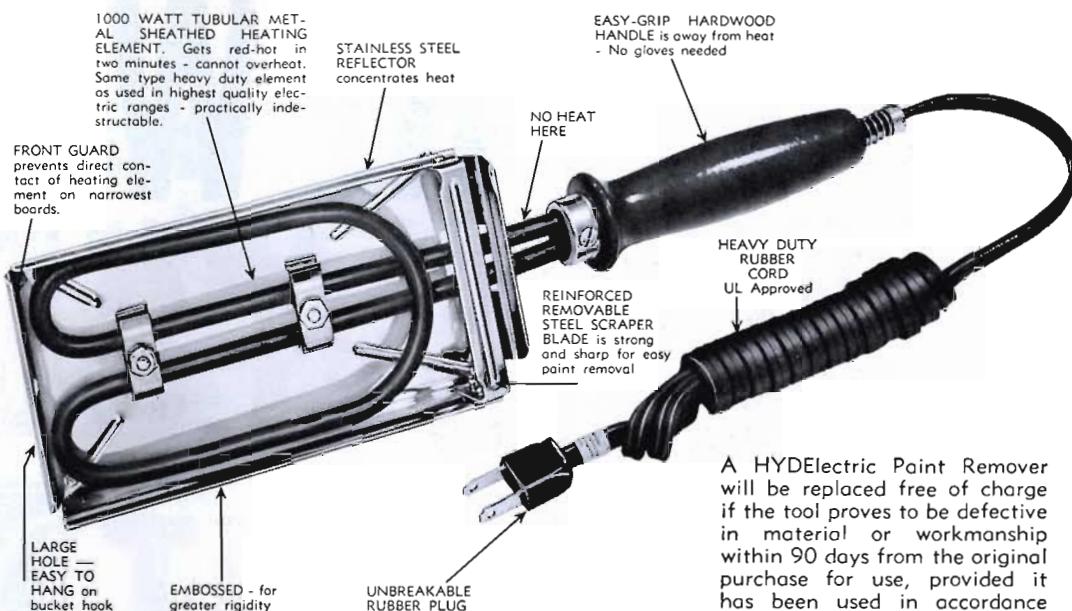

Boat paint comes off fast — on hulls, decks and cabins.

Outdoor furniture — softens and removes weathered paint.

Painted cabinets, doors, window sills, woodwork.

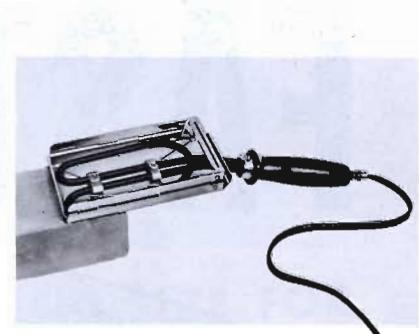

A HYDElectric Paint Remover will be replaced free of charge if the tool proves to be defective in material or workmanship within 90 days from the original purchase for use, provided it has been used in accordance with instructions. The Hyde Manufacturing Company makes no other warrant and has no other obligation for liability in connection with the HYDElectric Paint Remover.

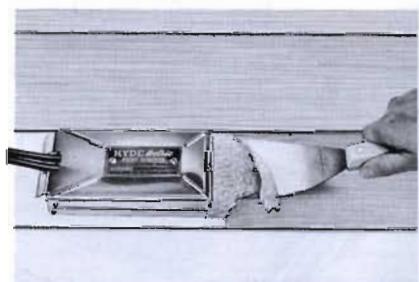

INSTRUCTIONS

IMPORTANT—Before using remover, fasten blade, from envelope in box, with four metal screws to underside of tool. Edge must face heating element. This blade reinforces scraper and prevents heating element from coming in direct contact with surface.

Plug into any convenient household outlet (115 Volt AC-DC). Place tool on its back on non-combustible material, inverted cookie pan or brick, see illustration 1. Allow to heat for two to three minutes. When element is cherry red, your HYDElectric Paint Remover is ready for use.

Rest HYDElectric on painted surface and allow three to five seconds to blister paint. Pull the HYDElectric Paint Remover slowly across the surface with one hand and follow approximately $\frac{1}{4}$ " from front with the Hyde No. 8 Bent Scraper, especially designed for this use, or slide remover slowly forward with little or no pressure using blade in tool to scrape off the paint.

After each use, clean all paint and residue on heating element and blade. Heating element is easily cleaned with steel wool. If an extension cord is needed, use No. 16 two conductor cord up to 50 feet and for lengths up to 100 feet, use No. 12 wire.

FURNITURE REFINISHING
CLASSES ACCLAIM IT

The Cobra Scraper, designed by a cabinet maker, is making a hit with both men and women who refinish furniture and prepare boats for repainting. Here is a scraper that anyone can handle. It's long, slim and light weight. The extra sharp, narrow blade makes it possible to remove old finishes down to bare wood easier and faster than regular scrapers. For open stock, order No. C88 packed 6 each in stock box.

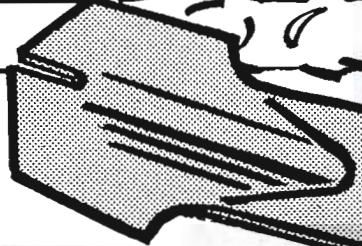

Shipping weight — 2 lbs.

HYDE

new!

Double Header

2-in-1 Putty Knife Tool

New Salesmaker

The Double Header is actually 2 tools in one. One end is especially designed to smooth out putty around the window sash for a professional-looking job, the other end to apply amounts of putty and to chip out old, hardened putty. Here is a top quality tool made of the best steel with shatter-proof, plastic handle. Individually carded with complete sales and use information.

**ALL TOOLS CLEAR COATED
TO PREVENT RUST**

Order Assortment No. C135 consisting of 12 each Double Header Tools and receive, at no charge, attractive rack. Rack is packed complete with tools in a corrugated container.

Shipping Weight 4 1/4 lbs.

Order No. C135 Assortment — RACK FREE

KWIK SKRAPE

Precision Tool

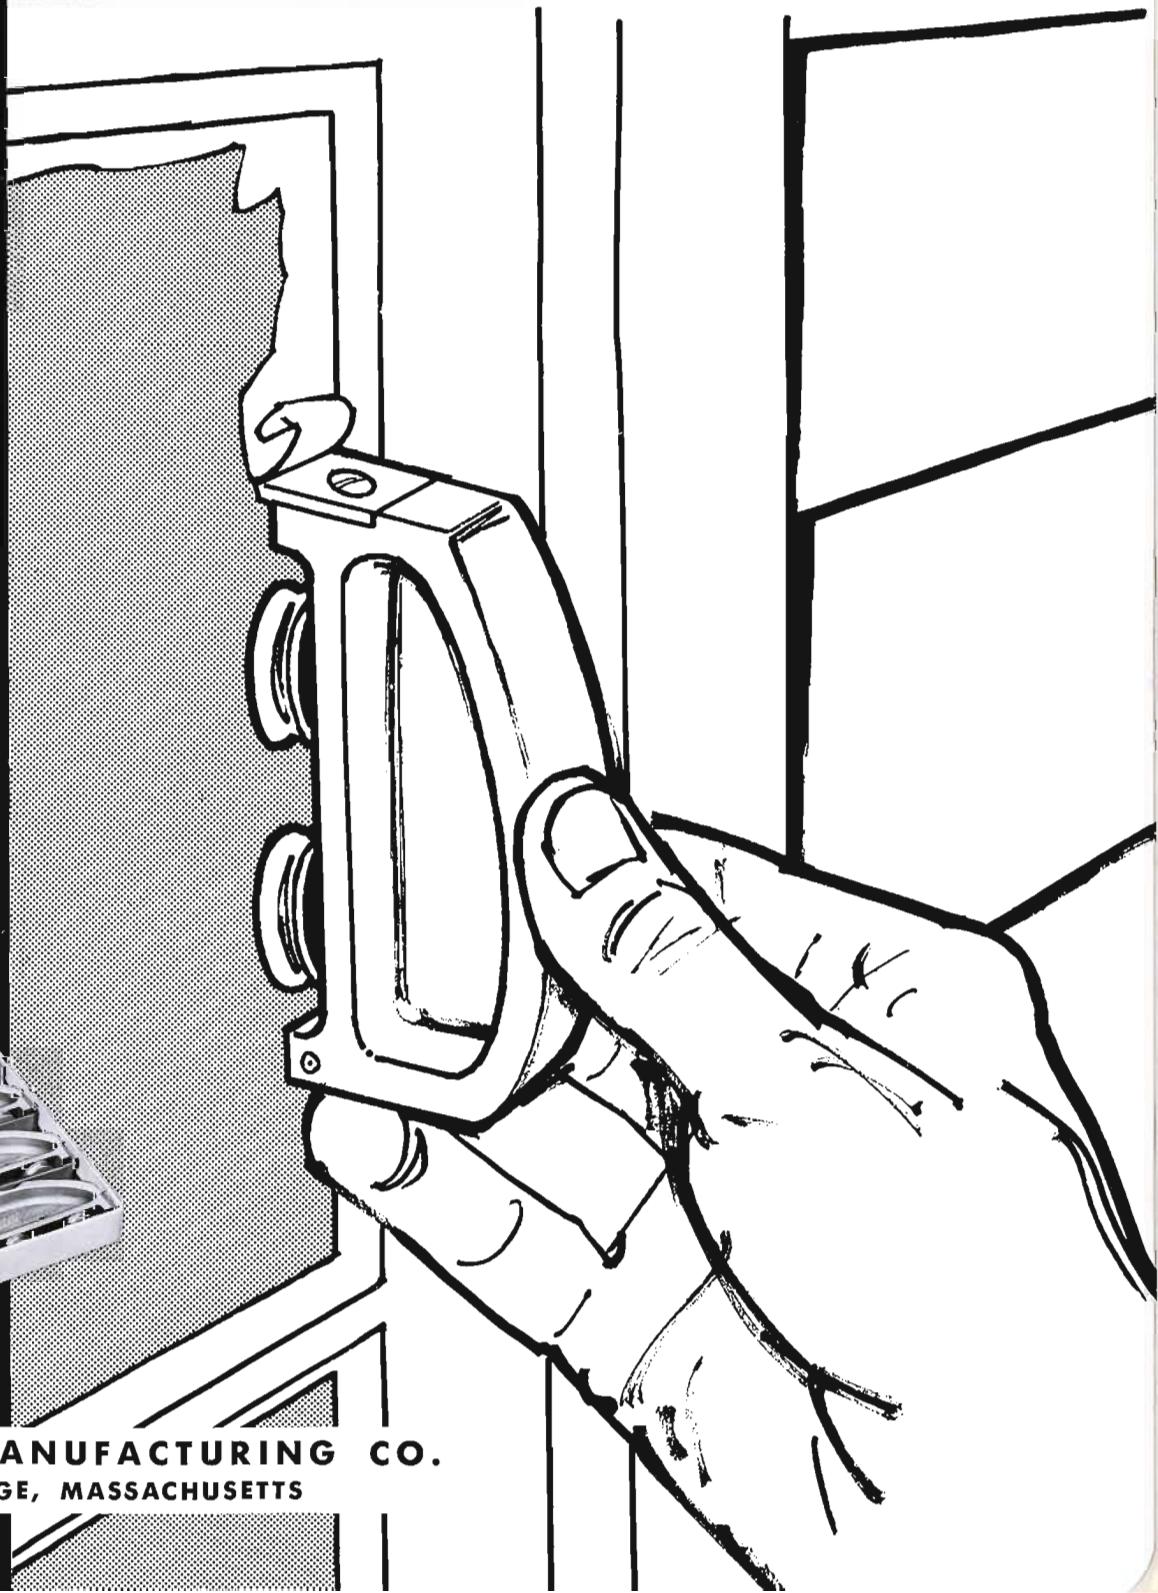

Salesmaker

for
DO-IT-YOURSELF
PAINTERS

Here is a tool that cleans up and removes paint around window sash, next to the putty edge. This is an especially designed, precision made tool that leaves a clean, smooth, painted edge against the putty. Hardened tool steel blade in cast handle with guiding wheels to glide along window glass on sash. Superior to a razor blade, here is a tool that will appeal to the do-it-yourselfer sash painter. Packed in self-serve identification counter box, 12 in display.

Shipping Wt. — 3½ lbs. per pkg.
